

AED/CPR Information Session

- If you are alone, dial 911 and put them on speaker phone. 911 will walk you through how to do chest compressions.
- If you are not alone, one person should call 911 and begin chest compressions while the other person grabs the AED machine.
- When giving CPR, keep doing CPR until EMS arrives. CPR is only to help replace a heartbeat. It will not revive an individual.
- The AED machine at Landis Place on King is located on the ground floor to the left of the mailboxes.
- The AED machine at Steeple View Lofts is located on the 2nd floor across from the elevator doors.
- The AED machine will read instructions on how to operate the machine. Calmly follow the instructions.
